VISION

To impart quality education to the students and mould them into proactive multifaceted Pharmacists.

MISSION

To establish a centre of academic excellence and research in Pharmacy Education and there by produce professionally competent and ethically sound Pharmacist to cater to the needs of the global society.

PROGRAMME EDUCATIONAL OBJECTIVES (PEOs)

After graduation students will;

1. Reflect critical thinking and problem solving skills through their Pharmaceutical knowledge, expertise and competency in industry, higher studies and research
2. Practice ethics and values in their profession
3. Contribute effectively in various fields of social healthcare system
4. Inculcate leadership and entrepreneurship capabilities through effective communications, appropriate time management and self upgradation

THE TORCHBEARERS OF EXCELLENCE

Padmashree Dr. D.Y. Patil

Founder President, Dr. D.Y. Patil Pratishthan

Dr. Sanjay D. Patil

President, Dr. D.Y. Patil Pratishthan

Shri. Satej Alias Bunty D. Patil

Vice President of Dr. D.Y. Patil Pratishthan
Chairman, Dr. D.Y. Patil Pratishthan's
Educational Complex, Akurdi, Pune

Col. S.K. Joshi (Retd.)

(Campus Director)

I take this opportunity to brief all the leaders of the elite magazine Pharmazine. We offer education in diverse and authentic professionals which in turn, benefits the students with well experience faculties and intricate yet excellent infrastructure.

This encourages the students to become competent and ethically sound professionals. Dr. D.Y.Patil College Of Pharmacy is established under the flagman ship of Dr. D.Y.Patil Pratisthan with the motive of spreading professionals ready to outreach and spread wings of social service through the health care industry.

"Service to man is service to godliness."

We at Dr. D.Y.Patil make students take pride in how far they have come. We inculcate moral and ethical values in them. In current scenario education is more than merely acquiring knowledge; it is acquisition of skills and knowledge, acquiring self employability and future leadership. The college is creating an environment to nurture creativity, passion, and leadership qualities in students. I feel highly proud to be a part of this institute, an institute that has extreme considerate attitude towards students and their process of learning. We believe in 'excellence in education' and look after the socio-cultural growth of students.

Alumni are the real torchbearers of any institute. They carry the college's name with them and to the places they fly. They embark the identity in such tremendous ways that is impeccable. We try to bridge the between generations and let them learn through the experiences of each other.

Lastly, I would like to thank all the members of the working committee for their tremendous efforts to make this magazine a success. I wish them luck for their future endeavors.

MESSAGE FROM THE PRINCIPAL & SECRETARY

PRINCIPAL'S MESSAGE

I take this opportunity to address and interact with the readers of Pharmazine 2018.

"Education is what they teach, knowledge is what we perceive aptly stated." In the competitive world, having brains is not enough, having knowledge is not enough too. Application of knowledge is the vital key to success. With the focused spectrum, perseverance, hard work and determination one can reach the epitome of success. No institution in the world has ever grown well to its dream without the support of alumni.

They are one of the important stakeholders as well as ambassadors of any college and with their steam of bubbling energy and breakthrough ideas they can best energize the college with abashing morals and ethics.

A decade ago, our college was a small organization and if we talk about today our graduates are widely spread across the globe in search for growth, learning, knowledge and their performance make difference everywhere. To bridge the gap between the alumni and the current students, we have set up a working alumni committee.

"Wheels start rolling week ago" the committee works throughout the years to make the annual alumni meet and the Pharmazine a great success. Pharmazine is a result of team work and contribution of the working committee. My regards to all the committee members for their hard work and valuable contribution to make this Pharmazine a raucous success.

Dr. N.S. Vyawahare
(Principal)

SECRETARY'S MESSAGE

Dear Alumni,

Warm greetings to all of you!

In the Pharmazine, we are looking forward to build a strong alumni base and to reach out to alumni of distinct fields and I truly believe this magazine will reconnect us all.

The Alumni association aims at promoting and fostering interaction amongst the alumni, the faculty and the present students, and serves as a link between the alumni and the college. The alumni could play an important role in providing direction to students and also participate in the initiatives of the institute, through appropriate designed programs.

Dr. (Ms.) S.C. Daswadkar
(Secretary: Alumni Association)

It is an important initiative and aims at strengthening the connection between the alumni and the institute, disseminate information about the goings on at our college and alumni and providing latter with an opportunity to provide valuable feedback, and also deliberate in the roll and activities of association. It should be remembered that the alumni association draws its strength from the alumni and looks forward to their greater participation and continued support. It is my sincere hope that we are able to hold the convention periodically and strengthen the bond amongst the alumni and Alma Mater.

I would like to acknowledge Alumni Association working committee members who took their precious time out of the feverish studies to support the Pharmazine 2019.

VIEWS OF THE PRESIDENT & SECRETARY OF THE WORKING COMMITTEE

PRESIDENT'S MESSAGE

I am honored to have been elected as the President of the Alumni Working Committee. The alumni working committee has been working very hard to make the Alumni meet and Pharmazine a great success.

The mission and commitment of our association remains the same, to keep our alumni connected to our college and provide guidance to our current students through our alumni's experience.

By this Pharmazine and our alumni association we are steadily growing from strength to strength and this year also we have maintained the tradition of honoring our alumni. Working in the alumni committee helps all the students to build up their overall persona.

At last I thank all the members of the working committee for showing their extreme dedication and allegiance to achieve the targets and making the Pharmazine work.

Pragma Choudhary
(President: Working Committee)

SECRETARY'S MESSAGE

"A journey of thousand miles begins with a single step"

I wouldn't agree more to this quote, because since the day I became a part of the committee, I have grown in leaps and bounds.

From being just a part of the committee to getting selected as the secretary of the working alumni committee, the journey has been like a rollercoaster ride that only went up for me.

The alumni association works with the alumni and the current students, along with the faculty as mediators to bridge the gap between and build a staunch Alumni-student network.

I extend my gratitude to the college, working alumni association for their constant support and painstaking efforts. Also, a very warm thank you to the alumni for co-operating and making such events a tremendous success.

Saloni Kadu
(Secretary: Working Committee)

THE GOLDEN PHASE OF MY LIFE

Dr. D. Y. Patil College of Pharmacy is much beyond just an institution, it actually denotes a Culture, culture of excellence, empowerment and enrichment. Being a part of D.Y.P.C.O.P, I feel blessed.

I would like to say that my two years at D.Y.P.C.O.P has been one the best time in my life. The college has moulded my personality and clarified my vision of future. It was very precious and golden phase of my life.

The faculty and other members of institution are very cooperative. I got a lot of support from my friends, teachers and it made my 2 years memorable for me.

As a post graduate student in QA, in the first year, I was heavily trained in basic analytical knowledge, from theoretical subjects i.e., quality assurance and analytical chemistry) using various research project such as statistical analysis by using different software as well as quality control research development.

My second year of study was focused on research project and my thesis, where I applied the knowledge I gained earlier. Indeed, college provided me opportunity for completion of my M.Pharm. project in research module named National Chemical Laboratory, Pocheon, Pune as well as provide internship program in various pharmaceuticals, Mumbai, Pune in Drug Regulatory Affairs department.

Apart from the excellent academic experiences, I also enjoyed benefits of being a part of many cultural activities. I continuously learned how to share ideas with people from different backgrounds and perspectives. The intensive and extensive interactions with people from different background and cultures equipped me with better interpersonal skills.

There are many things to say about the goodness of D.Y.P.C.O.P, including the outstanding library and computer labs, interesting cultural activities, various events such as poster presentation, Ad-MAD competition, and many more. To sum up, D.Y.P.C.O.P gave me not only the best study experience ever but also gave me the privilege of learning about different cultures, beliefs and perspectives. These all have helped me to succeed in my career after D.Y.P.C.O.P.

BHAKTI MALI

(2018)

INNOVATION CAN BE THE KEY TO SUCCESS...

In today's complex business environment, the ability to manage constant change through innovation can be keys to success. Business analysts can make it all happen more efficiently and effectively.

An analyst works primarily on objective of helping in business implement technology solutions in a cost-effective way by determining the requirements of a project or program, and communicating them clearly to stakeholders, facilitators and partners as such a job profile is also a booming filed wherein our students of D.Y.P.C.O.P. can work on it in future.

"Education is the manifestation of the perfection already in the man" for the education, when I stood in front of college gate for the very first time, many questions arouse. College life has joy, beauty and attraction of its own. It is an enjoyable period. There is a world of difference between the school life and the college life. In a school, students are just like birds in a cage. They are afraid of their teachers and have no freedom of movement or liberty of speech. But in a college the students are relatively free. They have the liberty to think, feel and state their opinion.

College life develops their head and heart. It is one of the most important periods when students can develop their hidden talents. Someone has rightly said that there is no real knowledge without college.

It's usual, many students feel the same once at least, but by the time being just due to the love and care from Dr. D. Y. Patil College of Pharmacy family, many conflicts gone very far. Every student think in the early part of the college life that how will I face the challenges coming on the way, but at the end of time, same student share the experience of "How he succeeded?" Many laughs and sorrows lies between the so called "college life". As this is just for 4 years but it remains in the memories forever.

I want to express my heartfelt thanks to D.Y.P.C.O.P. who gave me the perfect opportunity to explore myself and raise my confidence. I would like to thank the secretary of alumni associate Ms. Shubhangi Daswadkar ma'am who gave me the moment to express myself and a big thanks to all alumni working committee members of D.Y.P.C.O.P.

Sayali Shinde

(2015)

IT WAS A PRECIOUS & GOLDEN PHASE OF MY LIFE...

I'm currently working as the Quality officer leading the QA management at Oxygen Healthcare, Ahmedabad. Previously was working with GSK (GlaxoSmithKline) group of company at Ankleshwar and was handling the roles and responsibilities of QA officer.

Firstly, Dr. D.Y. Patil College of Pharmacy is not a college, it is a brand. It is unique in its field. Discipline is like in the air of its environment. I am so grateful to be a part of this college.

There are so many opportunities to develop one's personality in any field like, cultural, literature and many more. It was very precious and golden phase of my life. The entire faculty and other members of this institution are very cooperative. I got a lot of love and support from my teachers & colleague and it made my 4 years memorable for me. As I can even see that college has grown to extent since I left this college after my graduation.

I am having total 2-4 years of industrial experience. Now working on a position of Quality Officer at Oxygen Healthcare Company. I realized that jumping into the world out of college is wonderful and exciting time. It's a chance for us to put things we learned in our courses into practical use. One quote makes a difference in both life that 'in college we have lots of time but no money and when we start working we have money but no time'. My opinion is to cherish the happiness and learnings from college and laid into the working world.

Pharmacy being a health-related field and sensing the need of the hour, pharmacy encompasses various sectors of society in which Quality Assurance acts as a major role in any industry. The students of my college should empower with thorough knowledge and communication skills which help them to serve the society with full potential.

I am very fortunate to thank to every member of Dr. D. Y. Patil College of Pharmacy, Principal sir, teachers, friends for having a strong bond of love & friendship each other.

13. **What are the most common languages in the world?**

1. Where do you work currently?

Currently, I'm working as a GST inspector in refund and refund audit section of Maharashtra state goods and services tax department Mumbai.

Broadly the duty is to facilitate the assesseees to pay taxes, maintain records and in prevention wing, to catch smuggling, drugs supplies. At times, if one gets airport deputation then customs work is expected.

On the whole at present an indirect inspector is required to learn central excise and service tax acts for solving pending cases and to learn gst for forthcoming ones... moreover customs and NDPS act also need to be taken into the knowledge zone as the duty can take him/her anywhere.

2. Tell us about your college experience.

During my time college was in nascent stage. All staff was talented and very keen to help new students and always come up with the new ideas in order to make our learning of pharmacy easy and interesting.

3. What changes do you see in our college after your graduation?

Multinational companies coming for campus placements and collaboration with international universities. The infrastructure has changed drastically.

4. How drastically did things and plans change for you after your graduation?

Very much and in large manner when I decided to opt for competitive exams like MPSC. Study techniques which I learnt in college helped me a lot in clearing competitive exams.

5. What suggestion would you like to give to our current students?

Believe in yourself. Everyone is having something extraordinary. Search within, ignite that spark, world will see your success like a blast.

"BRING AN OPEN MIND, NOT A VACANT ONE", you are in college to learn, not find verification of your own biases and prejudices. You are going to face intellectual challenges to many of your pet theories, personal beliefs and values. The challenges do not mean what you consider dear or important are necessarily incorrect, but it does mean you may have to rethink the reasons why you hold them.

SHAILESH BHOSLE

(2010)

RISK ARISES FROM UNCERTAINTY...

1) Where do you work currently?

Currently, I am working at Alembic Pharma, Vadodara

2) Tell us about your college experience

I have spent 6 yrs in Dr D Y Patil College of Pharmacy. It was really great experience in terms of faculty, infrastructure, and higher management as Principal Sir and Vice Principal. They were always reachable for all students. Also we were having half yearly meeting with Principal Sir for all our concerns.

3) What changes do you see in our college after your graduation?

Lot of infrastructure changes. Huge improvement

4) What would you like to suggest our college students related to future prospects?

Students shall focus more on application of the knowledge they are gaining during education. If we are learning one process, then what is the scientific principle or theory behind, how to apply it during actual execution of the process? What shall be the steps to improve the process? Also, they should understand the industry. Different departments and the expertise required to work in those departments. This will be possible with more n more interaction with industry people and with training in industry.

5) What is your current field status?

I am working in project management department. It is the support department to smoothen interdisciplinary activities. The project manager must have a combination of skills including an ability to ask penetrating questions, detect unstated assumptions and resolve conflicts, as well as more general management skills.

Key among a project manager's duties is the recognition that risk directly impacts the likelihood of success and that this risk must be both formally and informally measured throughout the lifetime of a project.

Risks arises from uncertainty, and the successful project manager is the one who focuses on this as their primary concern. Most of the issues that impact a project result in one way or another from risk. A good project manager can lessen risk significantly, often by adhering to a policy of open communication, ensuring every significant participant has an opportunity to express opinions and concerns.

A project manager is a person who is responsible for making decisions, both large and small. The project manager should make sure they control risk and minimise uncertainty. Every decision the project manager makes must directly benefit their project.

Meghna Lande-Gade

(2006)

1) Where do you work currently?

Currently, I am working in Tata consultancy services, Thane, Mumbai.

2) Tell us about your college experience.

I learned lots of things from Dr. D. Y. Patil College of Pharmacy, And I always thank all teachers and Principal Dr. Vyawahare Sir. He is the youngest and the most deserving Principal I have ever seen in my college life. And I was inspired by his knowledge as well. I have completed my bachelors or B. Pharmacy from Rajgad Dyanpeeth College of pharmacy.

And after that I shifted to Chinchwad for masters. I like Dr. D. Y. Patil College of Pharmacy not only because of infrastructure but also noticed culture, environment of college and knowledge of teachers. Teachers were very friendly and they always supported us. I remembered they were personally involved in our projects and shared their knowledge and experience with us. About college experience, my higher education (M.pharm) started in 2013. It was a beautiful journey of my life, when I decided to complete my higher education I selected Dr. D. Y. Patil College of Pharmacy as my dream college. And I successfully entered or admitted. There were two years of experience in pharmaceuticals department. And I have learned many things from my teachers especially HOD Dr. Paresh Mahaparale sir. He supported us for our projects and motivated us for future or goal selection. And my batch mates also helped me a lot. Our batch was very sincere. And everyone was having different goals so it helped me to learn more things.

3) What changes do you see in our college after your graduation?

Actually I did not visit our college after completion of M. Pharm. But I have seen some posts on social media like facebook. Mukesh sir and Shilpa ma'am shared some pictures that I have seen and I am very excited to see our college. Our college always tried to provide knowledge by organizing different seminars and sessions which were helpful to us and different cultural activities also helped us a lot. Currently I am working as senior process associate in Tata consultancy services. Previously I was working in Cognizant Solutions Pvt. Ltd. Airoli. I have total 3 years of experience in pharmacovigilance.

4) Your current field status?

And currently I am very happy to work with Cognizant and TCS. Now I have become very passionate and self motivated employee and I would like to tell my juniors or students of this college, select your goals or choice as per your aims and think about your successful future or life positively really don't know how plans were changed.

5) How drastically did things and plans change for you after your graduation?

Actually I decided to work in research and development department of Pharma industries however my seniors told us regarding life science opportunity in this field. And I was impressed by it and decided to turn my goal towards pharmacovigilance.

6) What suggestion would you like to give to our current students?

In any situation never break down. I know sometimes, due to family and personal life, it is very challenging for you. There are so many twists and turns. Only think positive because miracles happen every day.

HAVE A FOCUSED VISION...

I am currently working at Emcure Pharmaceuticals Ltd. Pune.

Dr. D. Y. Patil College of Pharmacy has always been my happy-to-go and cheerful place. It has got perfect blend for all round traits development of any student. Being an active student, it has moulded my life in every possible prospect. It has given me great exposure to learning and fun activities with an essence of professionalism. Everyday is a new experience and thrill that makes you shine more and more.

Looking back, I have witnessed this place growing at every moment and crossing every bar. My 4 years at this place has been reward to my lifetime. I feel privileged to be a part of such an amazing college that has immensely supported me and has given timely guidance.

The memories and laurels which I have achieved here will behold footprints in my heart forever. D.Y.P.C.O.P. has been progressing at every step and never left any stone unturned for development of their students. Being recognised as an International University is the most privileged achievement and introducing new courses from Lakme Academy is commendable task.

This would definitely help the current students to groom in all spheres. Rather than addressing changes, I would appreciate the consistency maintained by our college to impart quality education and motivating students to pursue their dreams.

I would say, currently Pharma sector is under transition phase. New norms have been introduced to make sure that quality products are released. CDSCO is striving hard to maintain the same level with USFDA. It will impart more disciplined regulations in our country. Hence, we have to be updated.

Opportunities are immense in India as well as abroad. Have focused vision and a learning approach everytime because we learn very little from books and more from industrial practice.

Wish you all the best for your future!

GRAB THE OPPORTUNITIES...

It was a great time, spent in Dr. D. Y. Patil College of Pharmacy, Akurdi, Pune. Dr. D. Y. Patil College of Pharmacy has very wonderful faculty and they are very cooperative.

The relation between faculty and student is very cordial, which gave me an opportunity to excel further. The four years spent here were splendid and has helped me excel professionally as well as personally.

Apart from academics, department offers various opportunities to enjoy our college days which was attracting us towards college many of the time. Community activities, group assignments/tasks, skills development class etc., were helped me personally to groom myself in 360 degrees of life expectations.

A college is a nursery of fashions, particularly in dress. College life provides an opportunity to the students to develop their personality. They take part in various academic and cultural activities. They develop the capacity to organize functions and participate in them.

When we were in college, our life was surrounded by particular things. We were not aware what is going in the outer world. But this college has helped me building my confidence to face the outer world.

Dr. D. Y. Patil College of Pharmacy is the best college one could ask for. The faculties, teaching and non-teaching staff has helped me throughout my journey and taught me life experience. It is actually the seed-time in the life of a student. It paves the way for a prosperous and healthy life in the years to come. Those who make the best of their time at college find success waiting for them. An idler or time-killer repents in his future life. So the pleasure of college life can at best be translated into a better future. You can either be proud of graduating from a prestigious college or you can make your college proud of having prestigious alumni like you – the choice is yours, but at Dr. D. Y. Patil College of Pharmacy you get to do both.

I want to tell the students studying in Dr. D. Y. Patil College of Pharmacy to grab the opportunities best way possible and nurture your personality.

Anand Kapadia
(2008)

COLLEGE LIFE IS BOUND FREE LIFE...

My life is awesome period in college life . We who are studied here for a change to us in the college life learning not only inside knowledge but also outside knowledge. Friends are so helpful lectures are encourage a lot of about my carrier. College life was the most beautiful part of my life .

I can still recollect my first day on college, was traveling in college fellows , with few known and unknown people , wasn't happy with the first few days in college as I was fresh from school, as days passed by, was happy to get more friends from my class and my neighbouring class. All the four years was so memorable, and unforgettable

I like the college life for it's for its freedom, intellectual awakening and its various academic and extracurricular activities. I think that even after completing my education, I shall never forget the happy days I spent in the college. I began by putting my step forward in D.Y.P.C.O.P. and no wonder I soon achieved the zenith of my success in a short while. I transformed from a timid shy teenager to a person with clear vision. Grateful to the college and faculties for helping me trail the path to better future. They held my hand in such a way that even while feet were on the ground, my dreams touched the sky. I am what I am, because of the college

College life is a bound free life, here nobody is behind anybody for doing class. Nobody is there to see who is bunking and where they are. That's why amidst all fun of bunking there lies a responsibility of every student to understand that how much loss or gain they are doing to themselves by that. Fun and sincerity should always be well balanced.

One should not happen at the cost of other. Otherwise we will miss out one or both. Some people get married just after college. Some choose to do job and some go for higher studies. Everyone have their own choices. College life is a very memorable part of everyone's scrapbook, personal diary, photo album or anything else.

However it is, but it is close to the heart. If we are self-conscious, we will do both hard work and fun at a balance and thus make the most of it. Only fun will destroy us. And only responsibility will deprive us from a fun filled experience.
