Working Committee

DIRECTOR'S DESK

Dr. Niraj Vyawhare

It is an absolute pleasure for me to address each and every reader of "Pharmazine 2023".

Due to extraordinary technological advancements, technology, human progress, and lifestyle have all greatly flourished in the new millennium. Efforts are made by our institution to keep up with the latest Use of technology and globalization to promote a variety of creative and encouraging social and cultural events.

Science is a way of life, not just a subject. A significant revolution in one's life is equivalent to a revolution in science. It involves learning new things, developing strong character traits, and making one's own abilities more marketable.

Observing their progress gives students a wonderful sense of pride. Additionally, they are led to believe that they can leap higher and will soon reach the pinnacle of their potential.

Alumni are the true jewel of any university because they represent accomplishment at its highest level. At DYPCOP, we work diligently to foster positive relationships between alumni and students. Shakespeare wrote that experience makes a man. Our youngsters get to benefit from the wisdom of our seniors and fill in the cracks left by their errors. Our goal is to promote Alumni involvement and commitment throughout the rest of their lives.

Our institution continues to receive honors thanks to our alumni. The latest initiatives shown by our committee and executive council uplift me. I am incredibly inspired to see the alumni at work.

So as to hasten the development and growth of our institution Being a leader of an institution that upholds ethics and champions "Excellence through education" makes me feel really privileged. regard for morals It gives me tremendous pleasure to contribute to the Annual Alumni Magazine, "Pharmazine-2023".

VICE PRINCIPAL'S MESSAGE

Dr. S.P. Chaudhari

Dear Alumni,

It gives me immense pleasure to connect with all of you through this alumni magazine. As the Vice Principal of this esteemed institution, I feel honoured to witness the achievements of our alumni and the impact they have created in various fields.

The relationship between an institution and its alumni is crucial as it plays a significant role in the growth and development of both.

The success stories of our alumni are a testament of combined hard work and dedication put in by all the fraternity of institution and students.

As an academic institution, we have always aimed to inculcate the best professional knowledge, skills, and attitude in our students for the complete holistic development of themselves. We have strived to create an environment that fosters creativity, critical thinking, and a passion for lifelong learning. Our alumni are a reflection of our efforts, and we are proud of each one of you.

We encourage all our alumni to stay connected with us and share their experiences, achievements, and feedback. Your valuable inputs can help us improve and provide a better learning experience to future generations.

Once again, I extend my warm greetings to all the alumni of our institution. We are proud of you and wish you all the success in your future endeavor's.

SECRETARY'S MESSAGE

Dr. Shubhangi Daswadkar

Warmest regards to you all! I really believe that the Pharmazine will reunite us all. We are excited to establish a large alumni base and to communicate with graduates from other disciplines. The Alumni Association acts as a bridge between the alumni and the college and attempts to promote and cultivate connection among alumni, teachers, and current students. The alumni may have a significant impact on students' direction and program design.

It is a significant initiative that aims to improve the relationship between alumni and the institute, inform them of what is happening at our college and give them the chance to offer insightful feedback, as well as consider the role and activities of association. It should be kept in mind that the alumni association relies on their support and looks forward to their increased involvement. I sincerely hope that we can continue to organize the convention on a regular basis and further cement the connection between alumni and Alma Mater.

Pranav Shevkar
President, Working Committee

It is an incredible experience to jot down my views in this magazine which we are working upon since last few weeks. It has been my journey in this alumni association from being a host in First Year B. Pharm upto President of Alumni Association in Final Year B. Pharm. I entered this world of Alumni Association completely unaware about its significance and gradually recognising alumni as the torch bearer to the students of D.Y. Patil College of Pharmacy. Professional bond develops between alumni, students and institute which proves beneficial to each one of them in its own way. Together we have to strive so as to raise the levels of institute as well as our profession in the global market. I extend my sincere thanks to the Secretary of Alumni Association for giving me the opportunity for proving myself and also the entire Alumni Association committee for their valuable support through the process. Committee members have put in their best efforts and I congratulate each one of them for the success of this magazine.

Aditya Sarode
Secretary, Working Committee

'It gives me immense pleasure to put forward my views in upcoming issue of Pharmazine. Pharmazine is the platform where we have made cumulative efforts to share the ideas of alumni and students. Alumni and students together serve as the most significant stake holders of college. This interaction proves fruitful to all of us in many ways and encourages us to face upcoming challenges in this profession. Alumni have always helped and guided students through various ups and downs as they themselves have reached new heights of success through different circumferences of this profession. I am thankful to college and alumni association for their support and guidance in the success of Pharmazine. Congratulations to entire committee for their efforts and for the success of this magazine. Lastly, sincere gratitude and respect to all alumni for making of Pharmazine.

ALUMINI INTERACTION

In today's complex business environment, the ability to manage constant change through innovation can be keys to success. Business analysts can make it all happen more efficiently and effectively.

An analyst works primarily on objective of helping in business implement technology solutions in a cost-effective way by determining the requirements of a project or program, and communicating them clearly to stakeholders, facilitators and partners as such a job profile is also a booming field wherein our students of D.P.C.O.P. can work on it in future.

"Education is the manifestation of the perfection already in the man" for the education, when I stood in front of college gate for the very first time, many questions arouse. College life has joy, beauty and attraction of its own. It is an enjoyable period. There is a world of difference between the school life and the college life. In a school, students are just like birds in a cage. They are afraid of their teachers and have no freedom of movement or liberty of speech, But in a college the students are relatively free. They have the liberty to think, feel and state their opinion.

College life develops their head and heart. It is one of the most important periods when students can develop their hidden talents. Someone has rightly said that there is no knowledge without college.

It's usual, many students feel the same once at least, but by the time being just due to the love and care from Dr. D. Y. Patil College of Pharmacy family, many conflicts gone very far. Every student think in the early part of the college life that how will I face the challenges coming on the way, but at the end of time, at same student share the experience of "How he succeeded?" Many laughs and sorrows lies between the so called "college life". As this is just for 4 years but it remains in the memories forever.

I want to express my heartfelt thanks to D.Y.P.C.O.P. who gave me the perfect opportunity to explore myself and raise my confidence. I would like to thank the secretary of alumni associate Ms. Shubhangi Daswadkar ma'am who gave me the moment to express myself and a big thanks to all alumni working committee members of D.Y.P.C.O.P.

-Sayali Shinde

I'm currently pursuing M.Pharm in Pharmaceutical Regulatory Affairs at Manipal College of Pharmaceutical Sciences. When I was in Final year B.Pharm, I was sure that I didn't want to pursue a career in R&D, as it was not the field that I was interested in. Then, one of my contacts introduced RA as a career to me. It immediately caught my interest. The most important aspect of RA is that it is involved in all stages of drug development as well as after the drug enters the market. RA does not only involve the knowledge of all the existing guidelines,

regulations and acts but the major success lies in how we understand, interpret and act on them. RA is a very versatile department since we have to deal with the regulations of various countries. India is an emerging market and hence, the scope of RA in our country is unbeatable.

In this highly regulated environment, RA plays a critical role not only as the interface with health agencies and as a link between different departments in the company but also as the leading department to provide strategic advice on extremely difficult decisions throughout the life of a drug. Regulatory professionals keep working with the authorities and different departments within the company in order to meet regulatory commitments with the health regulatory authorities.

RA also ensures the maintenance of the marketing license and leads life cycle extension activities such as broadening the indication of the drug, change of formulation, changes in the dosage etc.

Regulatory Affairs is an attractive career choice for people who enjoy communication and team work, are comfortable with multi-tasking and are eager to expand their knowledge in the wide realms of the Pharmaceutical world

I wish you all the best for all your future endeavours.

-Sandeesh Lunawat

ALUMINI INTERACTION

A new academic year begins with new energy and vibrant faces on the campus. I want to give a small message to every individual who joins DYPCOP that here you will get ample opportunities to explore and develop yourself, DYPCOP encouraged me to explore my talent and potential by providing an exceptional integrated learning environment. I want to heartfelt thanks to the college who gave me perfect opportunities to explore myself and raised my level of confidence. I

am very grateful to my teachers who have changed my whole aspect towards learning.

"Our greatest weakness lies in giving up, the most certain way to succeed is always to try just one more time". DYPCOP provides a degree which is a key and is support to open the door to a world of opportunities. A lot of people want a shortcut but I find the best shortcut is the long way which are basically

two words " Work Hard.

-Surbhi Kapadekar

D.Y.P.C.O.P. is a place of knowledge and bliss. I began my step forward in this college no wonder I Soon achieved the zenith of my success in a short while I transformed from a timid shy teenager to a person with a clear vision.

I'm grateful to the college and faculties for helping me trail the path to a better future. It has provided me a wonderful environment and opportunity to learn and grow myself in every field. In college have not only got the boost for studies but also for other curricular activities as well have got infinite love & support from my professor at every step. They have encouraged me to polish my hidden talents in number of ways.

-Nilesh Chitte

ALUMINI INTERACTION

I am currently working at Emcure Pharmaceuticals Ltd. Pune.

Dr. D. Y. Patil College of Pharmacy has always been my happy-to-go and cheerful place. It has got perfect blend for all round traits development of any student. Being an active student, it has moulded my life in every possible prospect. It has given me great exposure to learning and fun activities with an essence of professionalism. Everyday is a new experience and thrill that makes you shine more and more.

Looking back, I have witnessed this place growing at every moment and crossing every bar. My 4 years at this place has been reward to my lifetime. I feel privileged to be a part of such an amazing college that has immensely supported me and has given timely guidance.

The memories and laurels which I have achieved here will behold footprints in my heart forever. D.Y.P.C.O.P. has been progressing at every step and never left any stone unturned for development of their students. Being recognised as an International University is the most privileged achievement and introducing new courses from Lakme Academy is commendable task.

This would definitely help the current students to groom in all spheres. Rather than addressing changes, I would appreciate the consistency maintained by our college to impart quality education and motivating students to pursue their dreams.

I would say, currently Pharma sector is under transition phase. New norms have been introduced to make sure that quality products are released. CDSCO is striving hard to maintain the same level with USFDA. It will impart more disciplined regulations in our country. Hence, we have to be updated.

Opportunities are immense in India as well as abroad. Have focused vision and a learning approach everytime because we learn very little from books and more from industrial practice.

Wish you all the best for your future!

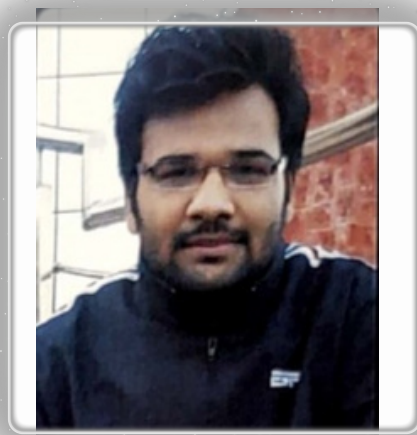

-Shweta Tiwari

Sneha Golle

DYPCOP!!.. A place which made me realize that no dream is small. A place which encouraged me to test my limits. It's been a rollercoaster ride during my four years at college. The crazy lab work.

The VADA PAV from architecture building, the crazy rush to finish the herbarium, being scared to death to dissect the mice during Pharmacology practical and the coffee obsession from our very own CCD on campus. Thank you for the amazing memories and making me what I am today.

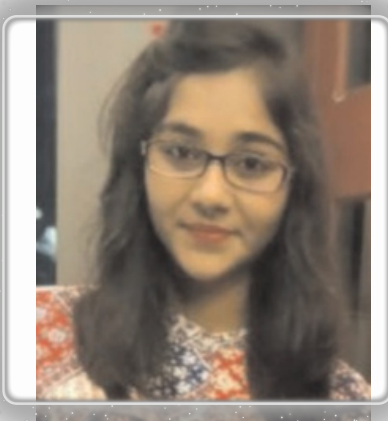

Gaurav Jaju

DYPCOP has been a crucial milestone in my journey. Teachers of this Institute are very supportive and keep a student oriented attitude. This provides a great learning opportunity to students. The college

strives to develop and nurture other aspects of my personality by conducting various cultural and sports events. I am grateful to be a part of such an institution. It also helped me in choosing my career and learning things related to academics and extra-curricular activities. I was a part of Alumni committee and it helped me a lot in building my confidence. This college has given me the exposure which is very helpful in corporate world. At last I wish everyone who joins DYPCOP has great

and successful college life and career.

Rutika Bhawik

"D.Y.P.C.O.P. has changed my way of thinking by carving out my career path. I want to thank my institution for teaching me the most important morals and ethics, not only during my precious college days

but also after the graduation through the annual alumni meet.

The alumni meet is an excellent route through which students can interact with alumni, share experiences, have a fun and frolic time and also make a ton of newer memories. The faculty members are

humble, learned and approachable which helped me during my graduation.

As career in the pharmacy was not a choice but by the excellent support and help of faculty I could make a good career in the field of pharmacy."

MEMORABLE MOMENTS

Happiness is not something ready-made. It comes from your own actions.
