Institution frequently updates its IT facilities and provides sufficient bandwidth for internet connection

Institution frequently updates its IT facilities including Wi-Fi

College has IT policy addressing standards on IT Service Management, Information Security, Network Security, Risk Management and Software Asset Management. It outlines the responsible use of the Information Technology infrastructure at the college such as use of licensed software only, procurement of IP based licenses wherever possible, antivirus on every machine, restricted access through firewall, regular information backup, and encouragement for usage of open source software.

The last five-year college has made consistent efforts to improve various computerization facilities and its infrastructure. Deployment of IT infrastructure is done through system administration team. All the academic and administrative IT infrastructure requirements are addressed by this team. The College regularly upgrades both the software and the hardware facilities. The following are the strategies for deploying and upgrading IT infrastructure and associated facilities.

- Computers are replaced periodically.
- Software are purchased and licenses upgraded as per requirement.
- Firewall and Anti-virus software are upgraded regularly.

The College is Wi-Fi enabled with high speed of internet to allow students to connect in the college premises like class room, library, and Hostel.

Additional information

For quality teaching, learning and research the college provides access to a variety of online resources as follows:

- All the classrooms have projector facility and laboratories are well equipped with either the computer systems or the WiFi
- Students and faculty members can access electronic journals and e-books from library digital lab and computer lab.
- Students and faculty members can access MOOCs resources.

Every faculty member is provided with computer and internet connection to prepare computer aided teaching-learning materials. In addition to this, printing facilities are available in every department with the HOD.

Technical glitch of application software if arises is solved immediately by a team of experts & engineers available in the campus on all days. Maintenance of CPUs and upgradation of software is also done by the team whenever changes have to be incorporated as per the legal norms and as per the need for the working of sophisticated instruments. Engineers and coordinator from computer lab coordinate the activity to ensure all computers and printers are in proper working condition.

Collpol software: The College has a Collpoll system which is used to track the fee collection, attendance record of the individual student, the CO- PO attained and the classes conducted. The software also includes planning of class in advance and is also used on regular basis for communication of University notices, internal notices and other important communications. It also plans to incorporate activities like NSS, Atmanirbhar abhiyan and other social events planned and executed by students

CCTV : To prevent and check unwanted activities and for the security of the students in the college, CCTV cameras have been installed at strategic points. The coverage
