### NOTICE

**Subject: Announcement of new courses**

Dear Students,

It has come to our knowledge that some of your peers wish to learn from other disciplines as well. We have also been briefed about the shared areas of interest and overlapping subject areas with other disciplines from Pharmacovigilance and Clinical Research.

It is in this light that the department has taken the initiative along with Dysmech Clinical Solutions (DCS) of launching a new course.

This course will be taught by faculty of DCS every Saturday from 10.00 am till 3.00 pm.

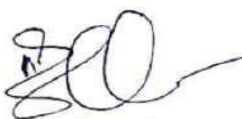

The course will follow the same assessment criteria as other subjects.

The course module shall include identification, validation, quantification evaluation and minimisation of adverse drug reactions of medicinal products, medicinal devices or therapeutic biologic products, thus increasing their safety. The objectives of the course are to understand the roles and related mechanisms in terms of pharmacokinetic factors, define the importance of pharmacovigilance, Express impact of the dose, Define therapeutic window, acquire knowledge that the purpose of the pharmacovigilance activities is to preserve human health, discuss the relationship between adverse drug reactions and mechanism of actions of drugs, define the properties of receptors on drug action, define the post receptor mechanisms, etc.

For more details please read the brochure attached herewith

We urge you all to take advantage of the course introduced which will be beneficial to you and make it a success

### Course Module & Outcome

**NPTEL online Certification course in Current regulatory requirement for conducting clinical trials in India for Investigational new drugs/new drug (Version 3.0)  
(August to October 2021)**

**Duration : 48 Hrs**

<b>Course Content/Module/Curriculum:</b>
Lecture 0: Course overview
Lecture 1: Overview of Indian drug regulatory system
Lecture 2: Overview of drugs & cosmetics Act and Rules thereunder
Lecture 3: Overview of New Drug and Clinical Trials Rules, 2019
Lecture 4: Pre-clinical data requirements
Lecture 5: Rules governing clinical trials
Lecture 6A: Phases of clinical trial, forms, and fees
Lecture 6B: Regulatory pathway and data requirements for NDCT, 2019
Lecture 7: BA/BE study and study centres: Legal provisions
Lecture 8: Guidelines to conduct BA/BE studies
Lecture 9: Ethics Committee registration and re-registration
Lecture 10: Ethical considerations
Lecture 11: Good Clinical Practice
Lecture 12A: Requirements for import/manufacture of new drug/IND for conducting clinical trials in India
Lecture 12B: Requirements for import/manufacture of new drug/IND for sale/distribution and unapproved new drug for patients
Lecture 13: Important issues
Lecture 14: Special concerns
Lecture 15: Clinical trial related guidelines (NDCT Rules)
Lecture 16: Content of proposed clinical trial protocol
Lecture 17: Content of a clinical trial report
Lecture 18: Post marketing assessment and clinical trial compensation
Lecture 19: Common observations during submission of CT/BA/BE protocol
Lecture 20: Common observations during CT/BA/BE centre inspections
Lecture 21: Drug development process: Overview
Lecture 22: Salient feature of NDCT 2019 (What's new in NDCT?)
Lecture 23A: Online submission (SUGAM)
Lecture 23B: Online submission (CTRI)
Lecture 24: Tables given in NDCT 2019 and its content
<b>Outcome - On successful completion of this course students will be able to :</b>
✓ Current New Drugs and Clinical Trials Rules 2019 for conducting clinical trials of the new drug or investigational new drug (IND) to be manufactured or imported in India
✓ Essential documents required for the conduct and approval of clinical trials, new drug/IND
<b>Assessment Procedure:</b>
✓ Objective Test

### **Certificate course in Quality by Design by Pharma Life cell**

**(12/9/2021 to 18/9/2021)**

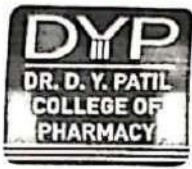

**Duration : 35 Hrs**

<b>Course Content/Module/Curriculum:</b>
1. Optimization techniques in Pharmaceutical Formulation and method development
<b>2. Statistical Parameters with special reference ANOVA method</b>
3. Screening by Plackett-Burman design 6. Screening by Two-level full factorial design
4. Optimization by Box-Behnken design 8. Optimization by Central composite design
5. Optimization by 3-level factorial design
6. Practical on Formulation development by QbD for various dosage form like Tablet, SMEDDs/SNEDDS, Microsponges, Niosomes, etc.
7. Practical on HPLC analytical method development by AQbD
<b>Outcome - On successful completion of this course students will be able to :</b>
✓ Organizational alignment to QbD/ICH guidance
✓ Cost savings and latitude in manufacturing to adjust controls within design space
✓ First time quality – one and done, avoids excessive rework and redo's
✓ Fewer and less critical audit findings
✓ Ease of Tech Transfer
✓ Effective and safe treatment of indication

### NOTICE

**Subject: Announcement of new courses**

Dear Students,

It has come to our knowledge that some of your peers wish to learn from other disciplines as well. We have also been briefed about the shared areas of interest and overlapping subject areas with other disciplines from Pharmacovigilance and Clinical Research.

It is in this light that the department has taken the initiative along with Dysmech Clinical Solutions (DCS) of launching a new course.

This course will be taught by faculty of DCS every Saturday from 10.00 am till 3.00 pm.

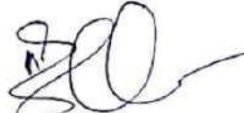

The course will follow the same assessment criteria as other subjects.

The course module shall include identification, validation, quantification evaluation and minimisation of adverse drug reactions of medicinal products, medicinal devices or therapeutic biologic products, thus increasing their safety. The objectives of the course are to understand the roles and related mechanisms in terms of pharmacokinetic factors, define the importance of pharmacovigilance, Express impact of the dose, Define therapeutic window, acquire knowledge that the purpose of the pharmacovigilance activities is to preserve human health, discuss the relationship between adverse drug reactions and mechanism of actions of drugs, define the properties of receptors on drug action, define the post receptor mechanisms, etc.

For more details please read the brochure attached herewith

We urge you all to take advantage of the course introduced which will be beneficial to you and make it a success
